Intelligent Process Automation

MACHINES

840M+
Information Workers

The long tail of business processes constrains digital transformation

Most companies still rely on unstructured, manual approaches for work processes

6 core capabilities for an IPA portfolio

ADVANCED WORKFLOW

Automate any business process—
from simple to sophisticated—
with drag and drop, no code workflow.

DOCUMENT GENERATION

Automatically create consistent,
compliant, up-to-date documents
with the push of a button.

MOBILE APPS & FORMS

Leverage mobile devices and
forms to capture critical data
—online or offline.

ROBOTIC PROCESS AUTOMATION

Automate highly repetitive
processes that a person would
typically perform.

PROCESS INTELLIGENCE

Govern, analyze, and drive the efficiency
of process automation with real-time
analytics and insights.

MACHINE INTELLIGENCE

Get assistance in completing tasks with
best-of-breed machine learning and
natural language processes.

State and Local Government Use Cases

- Requisition and Vendor Management
- Inventory Management
